

5-day Electrical Foundation Course

This course includes all the essential training and basic knowledge needed to gain the all-important Part P VRQ Qualification – a crucial part of becoming a fully qualified Domestic Electrical Installer.

Course Content

This Foundation Course offers practical installation, basic testing and inspection training under close supervision and expert guidance plus workshop-based electrical theory learning. It covers all the knowledge required to sit the Part P VRQ Examination – something that every practising electrician must do.

The course includes:

- Ring main circuits
- Basic lighting circuits
- 2-way lighting circuits
- 2-way lighting and intermediate circuits
- Radial power circuits
- Earthing and bonding procedures
- Calculating cable sizes and load demands
- Introduction to electrical regulations
- Health and Safety
- Safe isolation procedures
- Three phase systems
- Electrical calculus
- Practical training

Duration

5 days' intensive training.

Prerequisite

No previous experience required. If you already have some previous experience of electrical installation we recommend the [2-day Skills Update Electrical Course](#).
